Chemical Reactions & Equations · Board CBQs (Part 1 of 2)

58 questions · 88 marks · Competency-based

Generated 2 Nov 2026

Instructions: Solve on this sheet or separate paper. **Label each answer with its question number (Q1, Q2 ...).** When done, upload one PDF of all your answers on LazyTopper to get it graded with full solutions.

Section A

1 mark each

Q1. Which of the following is a NECESSARY condition for ALL chemical reactions?

(a) The reactants should be in the same state.

(b) Energy should be supplied to the reactants.

(c) The reactants should be at the same temperature.

(d) There should be physical contact between the reactants.

Q2. Dilip was comparing combination reactions with decomposition reactions. Which class of chemical substances may be a product of a decomposition reaction but is NEVER the product of a combination reaction?

(a) Compound (b) Oxide (c) Element (d) Salt

Q3. Which of the following reactions CANNOT be classified as combination, decomposition, displacement or double displacement?

(a) $2\ Mg + O_2 \rightarrow 2\ MgO$ (b) $CaCO_3 \rightarrow CaO + CO_2$

(c) $Fe + CuSO_4 \rightarrow FeSO_4 + Cu$ (d) $CH_4 + 2\ O_2 \rightarrow CO_2 + 2\ H_2O$
